Frank Brase

Senior Software Engineer & Architect | Developer Productivity & GenAI

Munich · frank.brase@gmail.com · +49 151 20144534 · LinkedIn · Github

PROFILE

Hands-on software architect and developer with 20+ years of experience designing and implementing complex software systems. Combines architectural responsibility with active software development, CI/CD automation, software quality and technical knowledge sharing. Uses AI-assisted development tools for rapid prototyping to support architectural decisions.

PROFESSIONAL EXPERIENCE

Software Architect (Hands-on)

ITK Engineering, Holzkirchen | 12/2022 – 07/2026

- Designed software architectures and contributed hands-on to the implementation of industrial and consumer products, including distributed and UI-intensive systems.
- Defined and implemented technical solutions involving microservices, cloud-native architectures and containers
- Automated builds and deployments in customer projects using GitHub Actions
- Applied GitHub Copilot, Cursor and Claude Code for software development and rapid prototyping to support architectural decisions
- Delivered architecture training and internal technical talks; supported presales activities in connectivity and telemetry

Embedded Software Developer

ITK Engineering, Munich | 02/2014 – 12/2022

- Developed software in C++, C, Python, Java, C#, Rust and Go across customer projects in multiple industries
- Developed applications and user interfaces using Qt/QML, React, GTK4 and Flutter for projects in industry, automotive, medical robotics and aerospace
- Trained junior developers in C++ software engineering workflows, including pull requests and code reviews, as a member of a dedicated trainer group

Software Developer

Alcatel-Lucent (now Nokia), Nuremberg | 07/2000 – 01/2014

- Developed high-performance software for mobile base stations and distributed telecommunications systems.
- Integrated network stacks and system functions in international expert teams.

CORE SKILLS

Architecture: Distributed Systems · Microservices · Cloud-native · arc42 · Software Design
Development: Modern C++ · Python · Java / Spring Boot · C · C# · Rust · Go · REST APIs
UI & Web: React · Vue · Angular · Qt/QML · Flutter · GTK4
Engineering & DevOps: GitHub Actions (CI/CD) · Git · Docker · Build &Deploy Automation · Code Reviews · Static Analysis · Code Coverage
Generative AI: GitHub Copilot · Cursor · Claude Code · LangChain · LangGraph · RAG · Azure OpenAI · LangSmith

EDUCATION & CERTIFICATIONS

Degrees: Diploma in Mathematics (Computer Science), Univ. Hannover · MSc Applied Mathematics, Brunel
Certifications: iSAQB-F Software Architect · ISO 26262 · ISO 13485 · Generative AI with GitHub Copilot
Languages: German (native) · English (fluent) · Spanish (advanced)
